

# Pitt and Greene

## Electric Membership Corporation

*“Where Customers Have A Choice”*

*Member Newsletter*

*November 2021*

***Pitt & Greene EMC will be closed Thursday and Friday, December 23rd and 24th for Christmas and Friday, December 31st for New Years.***

### ***EFFECTIVE January 1, 2022***

Using Debit and Credit cards are easy and convenient for all of us. Unfortunately, the banks charge businesses a processing fee for each transaction. This applies to Pitt and Greene EMC as well. We are charged a processing fee of 2.45% on each transaction. Beginning January 1, 2022, a fee of 2.45% of your total bill will be charged to offset what the bank charges us. Example, your bill is \$100.00 for the month. At 2.45% the fee applied will be \$2.45. We apologize for any inconvenience this may cause.

### ***Facility Charge Adjustment***

For many years now we have found ways to absorb the fluctuations in wholesale power cost. Many aspects of the membership demographics constantly change, and we have to find ways to adapt. With the passage of time and the ever-changing dynamics of our membership, the board directed a study of our rates to determine if changes were needed. In August, we received the results. Good news is in most cases the Kwh charge was reduced. While the cost per Kwh was reduced it was necessary to increase the monthly facility charge. Overall, the average monthly bill will increase by 1.77% beginning November 1, 2021. The last rate adjustment was in 2009, twelve years ago.

### ***Do you recognize any of the names listed below?***

***The following is a list of those who have capital credits owed to them from 2001. If you know any of the names, please ask them to call us at 252-753-3128 or 1-800-622-1362.***

## *Manager's Message*

*By: Mark A. Suggs*

### *What would life be like without electric co-ops?*

In the holiday movie classic, "It's a Wonderful Life" the lead character, George Bailey (played by Jimmy Stewart), wishes he had never been born due to financial troubles he is experiencing. Through the help of an Angel, he sees how many lives would have been negatively affected if he didn't exist. George comes to realize that, even with his problems, he has a wonderful life with great friends and family.

So what do you think life would be like if community leaders had not founded Pitt & Greene EMC on June 8, 1937?

It is nearly impossible for us to imagine life without electricity. So many of our modern conveniences that improve the quality of our lives are dependent on electricity as the "fuel" to make them work. From the alarm clock that wakes us up, to the refrigerator that keeps our morning milk cold and fresh. From the HVAC unit that keeps us cool in the summer and warm in the winter, to the vacuum that lets us clean more efficiently and all those kitchen appliances that save us time and physical energy. Of course, so much of our entertainment, whether it comes from the TV, radio or computer, depends on the kilowatt-hours that your electric co-op provides. Just think, there would be no smartphones or cell phones if there were no electricity.

Businesses of all kinds rely on electricity to produce and sell the products we need. So, it is no wonder that many electric co-ops feel that, while our primary product is electricity, we are really in the quality of life business.

As we celebrate the season that reminds us to be thankful for all that we have, it is important to remember the 1.3 billion people in the world that still live without reliable electric service. That is equal to about four times the U.S. population!

Many of the things we take for granted living in the U.S. are much harder and more time consuming for people in developing countries around the world. We are proud members of the National Rural Electric Cooperative Association (NRECA) that is working through their affiliate, NRECA International, and the NRECA International Foundation to help bring power to people in developing countries like Haiti and Liberia.

We are thankful that our community ancestors had the vision and foresight to do what needed to be done, gathering friends and neighbors to form the electric co-op. As the electric business of the 21st century continues to evolve, you can count on Pitt & Greene EMC to meet all of your electric energy needs. More importantly, we are here to help improve the quality of your life.
